## TERMS

**The Prices** in this list are for goods delivered at the purchaser's nearest railroad station all charges prepaid, except by special agreement, and any such agreement must be duly entered on the order.

### **Cash on Delivery.**

**We Pack Carefully** and agree to replace free any stock that fails to reach the customer in good, healthy condition if notified immediately on arrival of such stock. We further agree, should any tree or plant sold by us prove untrue to name, that we will replace same free of charge or return purchase price. It is mutually agreed between the purchaser and ourselves that we are not to be held liable for a greater sum than was originally paid for stock.

**Freedom From Disease.**—Our Nursery is inspected each year and we hold a certificate showing our stock to be free from injurious insect pests, a copy of which accompanies each shipment.

### **Parcel Post, C. O. D.**

Many small orders can be sent direct in this way, if the purchaser so desires. Orders to be sent Parcel Post, C. O. D., must amount to at least \$2.00.

**STRAWBERRIES**

**"Do not sell Strawberry Plants for Fall Delivery."**

No gardener or fruit grower plants Strawberries in the fall.

Our Strawberry plants are all freshly dug at time of shipment. Varieties marked (Per) have perfect blossom and will fruit when planted alone. Those marked (Imp) have imperfect flowers and will not fruit when planted alone, but must have some of the perfect flowering sort planted with them—one-third to one-half is about the proportion.

**Do not sell less than 25 plants of one variety.**

## HARDY PLUMS

A number of the following varieties are the product of the Minnesota Plant Breeding farm. These are putting plum growing in this section of the country on a new basis. Most varieties of plums are shy bearers when planted alone. To get the best results they must have some variety planted with them that is a good pollenizer. The ones marked (pollenizer) are good for this purpose. One of these for every three or four trees is about the right proportion.

## SHADE AND ORNAMENTAL TREES

## All Nursery Grown and No. 1

NOTE: To avoid any misunderstanding regarding the sizes and grades of trees, we make the following explanation: The 6 to 8 foot grade takes in trees that are 6 feet and over up to 8 feet, but does not include the 8 foot trees. The 8 to 10 foot grade takes in those that are 8 feet and over and under 10 feet, but not the 10 foot, and so on through all grades. For example, should you wish a tree 10 feet high and 1½ inches in diameter (or caliper) you must order the 10 to 12 foot tree; 1½ to 2 inch, as the 8 to 10 foot grade does not include the 1½ inch or 10 foot trees.

**THE COE, CONVERSE & EDWARDS  
COMPANY GUARANTEE**

A free replacement will be made of any stock that is given proper planting and care, and fails to grow the first season after planting, EXCEPT EVERGREENS. Those will be replaced at half-price, provided we are notified of the loss by October 1st after delivery.

## HOW TO PLANT ROSES

The secret of success in planting roses is **First**, to cut back the tops severely; **Second**, to water the plants thoroughly; **Third**, to cover the newly set plants with a mound of soil.

Do not expose their roots to sun or wind, to dry out.

Prune all the canes so that not more than four buds remain on a cane. This is very important.

Put in the plant and half fill the hole with top-soil. Do not use manure. Tramp the soil down hard and pour in four gallons of water.

Next draw a mound of soil up over the bush, fully 6 to 10 inches high, thus burying the bush completely and protecting the canes from drying out before growth begins.

Allow mound of soil to remain until the new growth has pushed through it fully six inches, then hoe the mound down gradually.

When planting roses in the fall, mulch the mounds with straw or strawy manure after the first hard freeze.

## SPECIAL INSTRUCTIONS TO OUR SALESMEN

Do not vary from the prices in this list and **sell only varieties that are listed.**

Do not make extravagant statements to obtain orders. It is always better to do more than we promise than to promise more than we can do.

Be sure all orders are dated and always leave an **Exact Duplicate** of the order as sent to us with the purchaser. The order and duplicate must agree to be legal.

Have the purchaser place his name and Post Office address in the proper place and you re-write the name **very plainly** at the bottom of the order and also sign your name as salesman.

It is very important that the **place of delivery, post office, R. F. D. or street number** is plainly written. Mistakes in any of these items often cause delay and extra expense at time of delivery.

Work your territory thoroughly, making the delivery at one point as large as possible.

Do not sell less than 6 trees or plants at dozen rates, or less than 50 at hundred rates.

# Number of Trees or Plants to Set An Acre

•

The following table shows the number of trees or plants required to fill an acre of ground when planted at the given distances apart—in feet:

3x1½	9680
3½x2	6222
3x4	3630
3x5	2904
3x7	2074
4x2	5445
4x4	2722
4x5	2178
8x6	908
8x8	680
10x10	435
18x18	134
20x20	108
25x25	69
30x30	48

If this table does not give the distances you desire to plant, divide 43,560 the number of square feet in an acre, by the number of square feet each tree or plant will occupy.
